

LRS

LEGENDS RACING SERIES

OFFICIAL RULEBOOK

League regulations, racing standards and championship rules

Cleaned and standardised edition

Based on the LRS rulebook supplied 15 August 2026

RULEBOOK INDEX

The official rulebook contains 21 numbered sections. The groupings below are provided only as a quick navigation aid; the rules remain numbered 1-21 in their official order.

RACING RULES

- 6. ON-TRACK RULES
- 8. QUALIFYING
- 9. SAFETY CAR / VIRTUAL SAFETY CAR
- 14. PROHIBITED BEHAVIOUR ON TRACK
- 15. PASSING AND DEFENDING

STEWARDING

- 12. STEWARD TICKETS
- 13. PENALTIES
- 17. FINALITY OF DECISIONS

LEAGUE RULES

- 2. GENERAL CONDUCT
- 3. COMMITTING TO RACE
- 4. TIER PLACEMENT
- 5. DRIVING ASSISTS
- 11. OBSERVERS / ENGINEERS

EVENT MANAGEMENT

- 7. LOBBY RULES / SETTINGS
- 10. LOBBY RESTARTS
- 16. SCHEDULE CHANGES

CHAMPIONSHIP & GOVERNANCE

- 1. CHEATING AND GAMEPLAY
- 18. RULE CHANGES
- 19. LIMITATION OF LIABILITY
- 20. PRIZE / TROPHY AWARDING
- 21. POINTS SYSTEM

OFFICIAL SECTION ORDER

- 1. CHEATING AND GAMEPLAY
- 2. GENERAL CONDUCT
- 3. COMMITTING TO RACE
- 4. TIER PLACEMENT
- 5. DRIVING ASSISTS
- 6. ON-TRACK RULES
- 7. LOBBY RULES / SETTINGS
- 8. QUALIFYING

- 9. SAFETY CAR / VIRTUAL SAFETY CAR**
- 10. LOBBY RESTARTS**
- 11. OBSERVERS / ENGINEERS**
- 12. STEWARD TICKETS**
- 13. PENALTIES**
- 14. PROHIBITED BEHAVIOUR ON TRACK**
- 15. PASSING AND DEFENDING**
- 16. SCHEDULE CHANGES**
- 17. FINALITY OF DECISIONS**
- 18. RULE CHANGES**
- 19. LIMITATION OF LIABILITY**
- 20. PRIZE / TROPHY AWARDING**
- 21. POINTS SYSTEM**

1. CHEATING AND GAMEPLAY

1.a | Cheating / Unfair Advantage

No form of cheating, gameplay manipulation, gamesmanship, or gaining an unfair advantage will be tolerated. This includes, but is not limited to, hardware modification.

1.b | External Programs

Running an external program to gain an unfair advantage is prohibited. This includes trainers and game-altering software.

1.c | Impersonating Another Driver

Impersonating another driver is prohibited. This includes playing on another driver's account to gain an advantage.

1.d | Race Manipulation

Agreements between drivers intended to affect the outcome of a race or another driver's race are prohibited.

1.e | Engine Noise Software

LRS understands that software exists which changes engine noise and, as far as LRS is aware, does not alter vehicle performance. If EA bans your account from online play because of such software, responsibility remains with the driver.

2. GENERAL CONDUCT

2.a | Bribery / Gifts

Participants must not offer or accept bribery or gifts connected with race disruption or disruption to the LRS Discord server.

2.b | Offensive / Threatening Conduct

Offensive, disrespectful, threatening, physically violent, or discriminatory words and phrases are not welcome on the LRS Discord server or during LRS race voice chat. Each case will be reviewed by the Administration Team and may result in time-outs, channel removal, permission removal, server warnings, or removal from the server.

2.c | Inflammatory / Off-topic Content

Posting inflammatory, extraneous, or off-topic messages with the primary intent of provoking an emotional response or disrupting normal on-topic discussion is prohibited.

2.d | Sound-alike / Look-alike Phrases

Sound-alike or look-alike phrases that reference prohibited topics may be removed by the LRS Administration Team.

2.e | Trolling

Trolling of the LRS Discord server is not welcome and may result in messages being removed.

2.f | Spamming / New Accounts

Spamming is not welcome and may result in removal from the LRS Discord server. Accounts less than one month old may be placed in timeout until proof has been provided.

2.g | Brand-Damaging Social Media Content

Drivers posting negative, disruptive, and/or brand-damaging content on social media about the LRS Series may be removed from the LRS Discord server.

2.h | Instigating Forfeits / Disruption

Any participant found to be instigating forfeits from other participants, collaborating to disrupt the competition, or otherwise obstructing the competition may be removed. This includes creating group conversations asking other participants to retire or forfeit.

2.i | Incidents From Other Servers

Incidents that happened on other servers should remain there. Discord members who repeatedly bring such incidents into LRS may receive up to three warnings, after which their continued membership may be discussed by the owners and may result in removal.

2.i.i | Keep Active Stewarding Incidents Inside LRS

During incident reporting and while steward decisions are being made, incidents must not be taken outside the LRS league server.

3. COMMITTING TO RACE

By signing up to any LRS racing division, you agree to respond to the appropriate race sign-up by accepting, declining, or selecting tentative/undecided.

3.a | Three Consecutive Races Missed

Not racing for three consecutive races may result in your full-time seat being removed and you being moved to a reserve position.

3.a.i | Reasons That Count Towards Strikes

The following may contribute towards your three strikes:

Not racing because you do not like the track.

Not racing because you do not like another driver.

Not racing because you have signed up to another league at the same time.

Personal injury. LRS accepts no liability for personal injury caused by your hardware during an LRS event.

3.a.ii | Inform LRS Staff

If you decide not to race, inform a member of LRS Staff as early as possible so there is time to replace you with a reserve driver.

3.a.iii | Legitimate Reasons

If you have a legitimate reason for consecutive absences and it has been discussed with LRS Administration, your seat may not be removed and a strike may not be applied.

3.a.iv | Drivers Watchlist / Future Seasons

If you are removed from your permanent seat, you may be placed on the Drivers Watchlist. This may affect your chances of signing up for the next season. If LRS Administration allows you to race in a future season and you again fail to attend three consecutive races, you may be permanently banned from signing up to future seasons.

3.note | Attendance Note

LRS understands that not every race is always attendable and that life is more important than the game. If you cannot make a race, please let an LRS Staff member know so a replacement can be arranged in good time.

4. TIER PLACEMENT

To keep drivers of similar pace together, LRS may request Time Trial or short qualifying laps from three tracks from new applicants.

4.a | Placement Evidence

Time Trial / short qualifying times are used as a guide. LRS may also consider previous experience with the driver in LRS or other leagues, comments from other drivers, LRS Staff and Management, and previous race recordings.

4.b | Disagreeing With Placement

If you do not agree with your tier placement, you may be placed in that tier as a reserve driver so LRS can compare your race pace against your Time Trial pace.

4.c | Invalid Reasons to Swap Tiers

Not wanting to race in a certain tier because of a personal issue with another driver, or because another driver is considered 'too fast', is not a valid reason to swap tiers. If there is a serious issue with your current teammate, LRS may investigate and may attempt to rearrange the team to resolve the problem.

4.d | LRS Right to Reassign

LRS Staff reserve the right to move a driver from their allocated tier if they are deemed too fast and this makes the tier unfair for other drivers.

4.e | Points When Moving Tiers

If you are moved up a tier, you will keep 50% of your accumulated points. If you are moved down a tier, you will keep 100% of your accumulated points.

5. DRIVING ASSISTS

5.a | Permitted Driving Aids

The following in-game driving aids are permitted:

- Brake Assist
- Anti-lock Brakes
- Traction Control
- Dynamic Racing Line
- Gearbox - any level

5.b | Assists Disabled in Championship Races

The following assists will be disabled during championship races:

- Pit Release Assist
- ERS Assist
- DRS Assist

5.c | Camera Configuration

Drivers may use any camera configuration they feel comfortable with.

6. ON-TRACK RULES

Drivers must make every reasonable effort to use the track at all times and must not deliberately leave the track without a justifiable reason.

6.a | Leaving Track to Provide a Tow

Leaving the track to remain ahead of your teammate in order to provide a tow is prohibited racing behaviour. Punishment will be determined by the Stewards and Administration.

6.b | Leaving Track for a Prolonged Period

Leaving the track for a prolonged period to let drivers past may cause the game to disqualify your current lap and potentially your following lap. This cannot be overturned by the stewarding team. It is recommended that you remain on track but stay off the racing line.

6.c | Driving Backwards

Driving backwards on track is forbidden and carries a race ban for your next event. The game should disqualify the offending driver, but if it does not, the race ban may still be applied if the incident is reported.

6.d | Dangerous Off-Track Rejoin / Lasting Advantage

Swerving off track and rejoining dangerously, or using an off-track excursion to gain a lasting advantage or position, is prohibited. Failure to comply may result in a penalty.

6.e | Responsibility While AI Controls the Car

Drivers are fully responsible for the actions of their car during all sessions. If a driver's car is controlled by AI at any time, the driver remains accountable for actions taken by the AI. This includes leaving the pits after the release warning and the game taking control of the car.

6.f | Teammate Incidents / Disruption

Teammates repeatedly causing incidents on track and disruption to the server or staff may be split up. If another driver does not want to swap seats, one of the teammates may be removed from the full-time seat and moved to reserve.

6.g | Conspiring Against Other Drivers

Teams found to be conspiring within the LRS server against other drivers to cause damage or purposely impede laps risk a race ban, seat removal, and/or server removal.

6.h | Blocking a Hot Lap for a Teammate

Blocking another driver while they are on a hot lap in order to allow your teammate past is prohibited and falls under qualifying impeding.

7. LOBBY RULES / SETTINGS

The lobby opening time and date are displayed on the weekly sign-up form. Drivers are normally given at least 3-4 days to respond. Typical event times are approximately 19:45-20:00 until 21:30-22:00.

7.a | Lobby Opening / Invitations

Once the lobby is open, an announcement will be made in the relevant tier channels. The lobby host will send invites. Please accept promptly so qualifying can begin on time. The lobby will generally start around 15 minutes after opening.

7.b | Running Late

If you are running late, notify the lobby host. The host may hold the lobby for no more than approximately five minutes.

7.c | Late Withdrawal

If you cannot race at short notice after sign-up has closed, approximately 19:30, alert the lobby host so your seat can be offered to the next driver in line.

7.d | Correct Team / Driver

Once in the lobby, select your correct team and the in-game driver of your choosing.

7.e | Do Not Ready Up Early

After qualifying, the lobby host may announce a short break before the main event or sprint race. Do not ready up early or immediately. Doing so carries a penalty. Do not ready the lobby before the race leader is ready.

7.f | Joining During Qualifying

Drivers may join during qualifying if they need extra time. You have approximately 10 minutes into qualifying to join the lobby and take control of your driver. Joining after this is not permitted unless the lobby host gives permission.

7.g | Unauthorised Invites

Anyone inviting a person who is not supposed to be in the lobby may be punished at the discretion of the Stewards or Staff. If this causes multiple lobby restarts, the person responsible may be removed from the race.

7.h | Forfeiting / Retiring

If you are going to forfeit the race session, do so in the pits to reduce the chance of a Safety Car. Retiring on track is punishable by the Stewards and carries a qualifying ban for your next event.

7.i | Blue Flags

Drivers should follow the standard procedure for blue flags and move aside at the next safe opportunity. Failure to do so may result in a game and/or steward penalty. If ghosting is enabled, maintain predictable racing lines through corners and make an effort to move over on straights.

7.j | Reset to Track

Drivers may reset to track if the car is beached. Your POV may be required if the reset is reported.

7.k | Difficulty Settings

Division 1 AI	95
Division 2 AI	80

7.l | Weather Settings

Quick Weather	Dynamic
Session Start Time	Realistic
Forecast Accuracy	Perfect

7.m | Rules and Flags Settings

Corner Cutting	Strict
Parc Fermé	ON (testing for Season 6)
Pit Stop Experience	Immersive
Safety Car	Reduced
Safety Car Experience	Immersive
Formation Lap	Off
Red Flags	Off
Affects Licence Level	Off

7.n | Simulation Settings

Equal Performance	On
Recovery Mode	None
Surface	Realistic
Low Fuel Mode	Hard
Race Start	Manual
Tyre Temperatures	Surface and Carcass
Pitlane Tyre Simulation	On

Unsafe Pit Release	On
Car Damage	Standard
Car Damage Rate	Standard
Collisions	On
Off for Griefing	Enabled

7.o | Incorrect Lobby Settings

An incorrect lobby setting does not automatically require a restart. The lobby host will decide whether a restart is necessary.

8. QUALIFYING

8.a | Intermediate Tyres for Warm-up

During qualifying, intermediate tyres may be used to warm up to the track, as LRS understands that not everyone has time to practise.

8.b | Yield When on the Wrong Compound

If using intermediate tyres on a dry track, you are expected to move out of the way of anyone using the correct compound. Failure to do so may count towards an impeding report. This also applies if you are attempting a hot lap on a compound deemed inappropriate for the track or weather conditions.

8.c | Deliberately Slow Qualifying Laps

Drivers deliberately completing slow qualifying laps may be judged to be impeding the lobby. Punishment is at the Stewards' discretion and may range from time penalties or penalty points to removal of race results or seat removal.

8.d | Serving a Qualifying Ban

If you have a qualifying ban, you are expected to apply your setup and retire immediately.

8.e | Towing Is Banned

Towing is banned in qualifying. This is intended to prevent drivers stacking up and waiting for others in order to use another driver's slipstream.

8.f | Pit Exit Warning Timer

It is not advisable to leave the pits and ignore the warning timer when you are unlikely to make the next qualifying lap in time. Cutting parts of the track is not permitted and may result in penalty points. You also risk the car entering an AI state and impeding drivers. If seen on the LRS stream or reported by another driver, your POV may be required.

9. SAFETY CAR / VIRTUAL SAFETY CAR

9.a | Deployment

When the Safety Car is deployed, all drivers must slow to a reasonable pace and maintain a sensible distance from the car in front. Delta values may differ between drivers, so erratic driving under Safety Car or Virtual Safety Car conditions may result in a collision.

9.b | Safety Car Restart Minimum Speed

At a Safety Car restart, drivers must keep their car above the minimum speed unless a corner requires a lower speed.

9.c | Maintain a Reasonable Pace

Drivers must maintain a reasonable pace. Going excessively slowly on purpose will be assessed by the Stewards and may result in a penalty at their discretion. Updated 09/04/2026.

9.d | AI During Race / Safety Car

Being in AI during a race or under the Safety Car is not allowed and carries a 5-second penalty added to your final time.

9.e | VSC Instructions

Drivers should follow instructions issued by the game when a VSC is deployed. Failure to do so may result in a penalty from the game and/or the Stewards.

9.f | Dangerous / Erratic Driving

No driver may drive unnecessarily slowly, erratically, or in a manner that could be considered dangerous while the VSC or SC is deployed.

9.g | Safety Car Instructions

Drivers should follow instructions issued by the game when a Safety Car is deployed. Failure to do so may result in a penalty from the game and/or the Stewards.

9.h | VSC Delta

Drivers must maintain a maximum sub-2-second delta to reduce the pack or DRS train being split on the VSC restart.

9.i | Overtaking Under SC / VSC

Overtaking under the Safety Car or VSC is prohibited even if the game instructs you to do so. If allowing another driver past, pull off the racing line safely and take care when rejoining.

10. LOBBY RESTARTS

10.a | Officials' Restart Authority

If a significant number of drivers do not complete a session for any reason, the session may be restarted at the sole discretion of Officials. A race may also be restarted when an on-track incident significantly impedes multiple drivers or prevents them from continuing. Officials reserve the right to restart, cancel, end, or otherwise amend a session at any point.

10.b | No New Drivers After Restart

If a restart occurs, no new driver may join the lobby. The grid remains the same as at the start of the original race. Missing the original start does not create an opportunity to join the restarted race.

10.c | Early Start

An early start does not automatically require a restart. Drivers are responsible for being ready to race during the lobby. This does not excuse starting the lobby early; punishment may still be given to the driver who initiated the early start.

10.d | Incorrect Lobby Settings

If the lobby is set up incorrectly and the race has started, the lobby host decides whether to restart. The decision may consider how many drivers are affected, which setting is wrong, and whether the setting has a detrimental effect on participants.

10.e | Mass Disconnect

If a substantial number of drivers disconnect from the lobby or race, a restart may be considered if fewer than 5 laps have been completed. Anything over 5 laps will not be restarted.

10.f | Grid Place Penalties

Grid place penalties are not normally a reason to restart unless they were caused by malicious contact. In that case, the lobby may be restarted and the offending driver removed.

10.g | Forgotten Setup

Forgetting to apply your setup is not a reason for a lobby restart unless the Race Leader determines otherwise.

10.h | Restart Responsibility

If a lobby restart is required, the lobby host should act immediately. If the lobby host is also a driver and unnecessarily delays calling the restart, time and/or penalty points may be applied against their final result.

11. OBSERVERS / ENGINEERS

11.a | Observers

Observers within the game are prohibited unless they are an Official or a person engaged by Administration, or on its behalf, in hosting, management, or production.

11.b | Virtual Race Engineers

Virtual race engineers are permitted. Examples include Crew Chief, the F1 in-game engineer, Racing League Tools, and Pit Crew.

11.c | Drivers Who Retire Early

Drivers who retire early are asked to leave the lobby. You may continue watching via the commentator stream or another driver's streamed POV. Remaining in the lobby after retiring may cause you to be treated as an observer, which is prohibited.

12. STEWARD TICKETS

12.a | Clear and Accurate Reports

When opening a stewarding ticket, follow the bot instructions and provide clear, truthful information. Ensure your description does not conflict with your evidence.

12.b | 24-Hour Submission Window

Stewarding tickets and evidence must be submitted within 24 hours of the race finish. This includes defence evidence. Evidence submitted after this window may not be considered unless an extension has been agreed with LRS Staff.

12.c | Stream Sniping / Reporting From Another Driver's POV

Stream sniping and reporting drivers using only their own streamed POV is not allowed.

12.c.i | Official Stream Exception

The Official Stream may be accepted as the main POV only for self-DNF or retiring-on-track offences.

12.d | Main Evidence Requirements

Your main evidence should be your own POV, including in-game telemetry and the game's white/red proximity arrows. The Official LRS Stream may be used as secondary evidence but must be accompanied by your main POV.

12.d.i | Who Should Report

In the spirit of fair racing, only drivers involved in an incident should normally report it rather than reporting unrelated incidents they simply observe on track.

12.e | Ticket System Abuse

Abusing the ticket system is prohibited. Continued abuse may result in your ability to open tickets being removed, requiring an LRS Staff member to open a ticket on your behalf.

12.e.i | What Counts as Ticket Abuse

Ticket abuse includes:

- Arguing with the Stewards.
- Continually opening tickets for no valid reason.

12.f | Requesting POVs

Within an incident ticket, only LRS Stewards or Management may request POVs.

12.g | Report Incidents Properly

If you have an incident, report it through the proper system. LRS is under no obligation to act on incidents that are only sent by DM to Management.

12.h | Appeals

A driver may appeal a ticket they are involved in if they are unhappy with the Stewards' decision. The appeal should include the original evidence and any new evidence or description that may assist.

12.i | Who May Appeal

Only drivers involved in the original ticket may appeal its outcome.

12.j | Failed Appeal Limit

After three failed appeals, your right to appeal may be removed to prevent repeated appeals and unnecessary use of stewarding time.

12.k | Appeal Deadline

Appeals must be submitted within 6 hours of the stewarding ticket decisions being announced.

13. PENALTIES

Stewards may award penalty points depending on the severity of an incident. Every incident is different and penalties may vary depending on context. The penalty system is a guide only, and Stewards may also award a time penalty for any incident.

13.a | Minor Avoidable Collision

Small contact that negatively affects another driver's race may result in 1 penalty point plus a time penalty. Example: a driver loses up to 5 seconds or one race position.

13.b | Moderate Avoidable Collision

Moderate contact causing small damage or time loss may result in 2 penalty points plus a time penalty.

13.c | Major Avoidable Collision

Large contact resulting in major damage or a DNF may result in 3 penalty points plus a time penalty.

13.d | Qualifying Lap Blocking

Causing another driver time loss on a qualifying lap will result in a qualifying ban at your next event.

13.e | Failure to Supply Requested POV

Not supplying a requested POV will result in 1 penalty point being added.

13.f | Pit Entry / Exit Line Cut

Cutting the pit entry or exit lines on track will result in a 5-second time penalty added to your final time.

13.g | Intentional DNF

Intentionally causing another driver or yourself to DNF may result in race, season, and/or server bans.

13.h | Reset to Track

Resetting to track will result in a qualifying ban at your next event unless the car is beached and your POV shows this when requested.

13.i | Ignoring a Qualifying Ban

Purposefully ignoring a qualifying ban will result in a race ban at your next event.

13.j | Penalty Point Thresholds

6 PP	Qualifying Ban
10 PP	Race Ban
12 PP	Qualifying Ban

16 PP	Race Ban
20 PP	Qualifying Ban
24 PP	Season Ban

13.k | Probation After Championship Ban

After serving a championship ban, a driver may return on probation for half a season, depending on season length. During probation, the driver may accumulate a maximum of 12 points. Reaching 12 or more points during probation will result in removal from the league.

13.l | Time Penalty Conversion After DNF

If you DNF and a stewarding ticket goes against you, the time penalty will be converted into penalty points:

3 seconds	1 PP
5 seconds	2 PP
10 seconds	3 PP
15 seconds	5 PP

13.m | Requesting Removal of In-Game Penalties

You may request removal of an in-game time penalty if you believe it was unfair. Provide a clear Race Director showing when warnings or the penalty were received, plus the original footage of the warning you want removed. If claiming a double warning, provide as much of the lap as possible.

14. PROHIBITED BEHAVIOUR ON TRACK

Drivers are expected to demonstrate sportsmanlike behaviour and clean racing at all times. Drivers implicated in prohibited on-track behaviour without valid justification, and/or who gain a lasting advantage, may be penalised at the discretion of Officials.

14.a | Blocking

Two consecutive line changes that impede a driver attempting to pass.

14.b | Brake Check / Test

Braking hard with malicious intent to cause damage to cars behind or cause a collision.

14.c | Dangerous Rejoin

Rejoining the track after leaving it in a way that causes a collision or forces another driver off track.

14.d | Dive Bomb

An overly optimistic passing attempt that may lead to contact with another driver.

14.e | Driving the Wrong Way

Driving the wrong way around the track to cause damage to others or yourself.

14.f | Excessive Weaving

Multiple line changes intended to break the slipstream or force another driver to take aggressive avoiding action.

14.g | Impeding a Lapping Car

Obstructing or blocking, without valid reason, a trailing vehicle that is attempting to lap the leading vehicle.

14.h | Jump Start

Moving from the grid slot before the race start is signalled.

14.i | Ramming / Punting

Contact where the leading car is significantly knocked from the racing line and/or track, or is damaged as a result.

14.j | Rough Driving

Overly aggressive or forceful driving resulting in contact and/or one or more cars being unfairly impeded.

14.k | Sandbagging

Submitting slower-than-normal Time Trial laps in an attempt to be placed in a slower division for easier wins.

14.l | Stopping on Track

Bringing a vehicle to a complete or near-complete stop, or leaving a car stationary on track. This includes practice starts and stationary ghost vehicles.

14.m | Unsafe Pit Entry

Entering the pits without making a reasonable effort to stay within the white pit entry lines and/or unfairly obstructing another vehicle.

14.n | Unsafe Pit Exit

Crossing the yellow pit exit line with any part of the vehicle and gaining a lasting advantage, obstructing another driver, or attempting to defend a position.

14.o | Wall Riding

Making intentional contact with a fixed part of the track in order to change the car's direction.

14.p | Impeding a Qualifying Lap

Obstructing or blocking, without valid reason, another vehicle that is on a qualifying hot lap.

14.q | Corner Cutting

Corner cutting during out laps or in laps to save time or to aid/hinder another driver is forbidden. The exception is moving out of the way of a driver on a hot lap, where the slower driver should take appropriate precautions.

14.r | Retaliation

Retaliating because another driver caused you time or position loss on track. Retaliation penalties are penalty points only and are not accompanied by time penalties.

14.s | Retiring in the Pits

Retiring in the pits because a race is not going your way will result in 2 penalty points when reported.

14.t | Excessively Long Qualifying Laps

Taking longer than necessary on a qualifying lap may result in a post-race time and/or penalty point sanction at the discretion of Stewards or Staff.

14.u | DRS Chicken

Purposely slowing before a DRS zone to allow the following driver past in order to gain a DRS advantage in the next zone.

14.v | Retiring on Track

Quitting the race or game abruptly while on track, potentially causing a VSC or Safety Car.

14.w | Deliberately Causing a VSC / Safety Car

Causing a VSC or Safety Car on purpose to gain an advantage with a conspiring driver or teammate.

15. PASSING AND DEFENDING

The responsibility for deciding to pass another car, and for doing so safely, rests with the overtaking driver. The leading driver must also observe the rules when defending. All drivers involved in passing and defending must follow the rules below.

15.1 | Leading Driver's Line

The leading driver has the right to choose any line so long as it does not deny another vehicle adequate racing room.

15.2 | Definition of Racing Room

Racing room is considered to be one car's width measured from the outside of the white lines defining the track edges. Once a trailing car has its front wheel next to the rear wheel of the leading vehicle, the trailing car is considered to have a right to be there and must be left sufficient racing room.

15.3 | Minimal Overlap

If a trailing car has only its front wheel, or less, alongside the leading vehicle by the corner turn-in point, the leading vehicle generally has the right to choose its line and the trailing car is responsible for avoiding contact.

15.4 | Significant Overlap

Once a trailing car has its front wheel alongside or beyond the leading driver's position by the corner turn-in point, the trailing car generally has a right to be there and the leading driver must leave sufficient racing room.

15.5 | Shared Claim to the Line

If the trailing car's front wheel is ahead of the leading car's rear wheel but behind the leading driver's position by the turn-in point, both drivers may have a reasonable claim to the line. A collision may be judged a racing incident if no other rule has been broken.

15.6 | Acceptable Side-to-Side Contact

If adequate racing room is left and incidental contact occurs between the cars, the contact may be considered acceptable side-to-side contact provided no other rule has been broken.

15.7 | Side-to-Side Contact Leaving the Track

If side-to-side contact causes one or more cars to leave the racing surface involuntarily, the incident may be considered a racing incident. Failure to follow the passing and defending rules may still result in a penalty.

16. SCHEDULE CHANGES

16.a | Officials May Amend the Schedule

Officials may, at their sole discretion, reorder racing within a given day, change the date of an LRS Series event or qualification period, or otherwise modify the racing schedule. Drivers and teams will be notified at the earliest reasonable opportunity.

17. FINALITY OF DECISIONS

17.a | Final Decisions

All decisions regarding interpretation of the rules, eligibility, scheduling and staging of the LRS Series, and penalties for misconduct lie with the Officials. Decisions are final except where an appeal is expressly permitted by the rules.

18. RULE CHANGES

18.a | LRS Right to Modify Rules

LRS reserves the right to modify the rules governing the LRS Series when circumstances require it, including changes caused by software and/or game updates or releases. Drivers should check the current rules and the official LRS server before each event.

19. LIMITATION OF LIABILITY

19.a | Limitation of Liability

Administration accepts no responsibility for damage, loss, liabilities, injury, or disappointment incurred as a result of participating in the LRS Series or any event connected with the competition or accepting any prize, except where liability cannot legally be excluded.

20. PRIZE / TROPHY AWARDING

20.a | Minimum Age for Championship Prize

You must be over the age of 16 to receive the championship prize directly. If you are under 16, the prize will need to be sent to a parent's Revolut account.

20.b | International Winners

If you are outside the UK, postage and tax may affect the prize. Any difference will be discussed with you after the championship.

20.c | Prize / Trophy Timescale

LRS aims to deliver prizes and trophies within three weeks of the end of the championship. If there is a delay, LRS will discuss it with you.

20.d | Alternative Trophy Delivery

If you do not wish to provide your address, LRS may send the trophy to a suitable nearby drop or locker collection point.

20.e | Gift Card Alternative

If you do not wish to provide your Revolut details, or a parent's Revolut details where applicable, LRS may issue the prize as a gift card of your choosing.

20.f | Prize Payment Method

LRS no longer uses direct bank transfers for prize distribution. Revolut is the standard method for sending funds.

21. POINTS SYSTEM

21.a | Race Points

1st	25 points
2nd	20 points
3rd	16 points
4th	13 points
5th	11 points
6th	10 points
7th	9 points
8th	8 points
9th	7 points
10th	6 points
11th	5 points
12th	4 points
13th	3 points
14th	2 points
15th	1 point
16th	0 points

21.b | Fastest Lap

Fastest Lap - 1 point
